Project Results

Two years after its kick off, the Life Eco Pulplast project can show its first relevant progress achievements.

The **prototype installation and testing** was completed last June and more recently the activity has focused on experimental testing on the first pallet production.

After tuning the main **process parameters** such as temperature, injection pressure and cooling time, the activity focused on the evaluation of raw materials and on the development of plastic compounds, particularly with regard to their machinability as well as to pallets characteristics and performances.

Workshop 6 October 2017

On Friday October 6, 2017, at LUCENSE, **over 90 participants** listened carefully to the updates about the Life-Eco-Pulplast project, two years after its launch.

Simone Giangrandi from LUCENSE and **Francesca Paoli** from Selene, project coordinator, illustrated the project state of art, which has entered in its crucial phase, with the commissioning of the prototype line and the first pallets production.

Green Italy 2017 - Italian environmental excellence grows

Realacci: "The need for a more sustainable and human-sized economy is

stronger and stronger, as well as the need for a more competitive economy”.

On October 24th 2017, **Green Italy Report** was presented in Rome by Symbola Foundation and Unioncamere, in collaboration with CONAI and under the auspices of the Ministry of Environment and Ecopneus. In this 8th edition what emerges is a **scenario of realistic optimism** for the enormous potential of sustainable development for Italy, where several **individual excellences in green economy** increasingly contribute to improve the environmental, economic and social impact through, for example, nearly 3 million workers involved in the so-called **green jobs**.

European Paper Recycling Awards: Italy is a leading actor

On October 18th 2017, the [European Paper Recycling Council](#) (EPRC) took place. The ceremony rewards the brightest and most innovative paper recycling projects from across the continent with the prestigious [European Paper Recycling Award](#).

The winning projects were [Remake](#) by Favini and [Blue Birdies](#) by Spanish Aspape but **Italy got a mention for its two highly scored projects:**

Information and Education category:

- [Comieco](#)'s online contest “**#iorompolescatole**” (in English: “I break boxes”) on raising awareness of recycling paper & board packaging from e-commerce

Innovative Technologies and R&D category:

- [Lucart](#): **separating cellulose** from beverage cartons to be reused for tissue production

“Today’s winners are the pioneers that are paving the way the European paper recycling value chain is advancing paper recycling to the next level”
says Lisa Kretschmann, Chairperson of the EPRC.

The LIFE ECO-PULPLAST project aims at demonstrating the possibility to recycle pulper waste – the industrial waste of paper mills that use recovered paper – in the manufacturing of eco-sustainable plastic pallets.
